(1) health and safety, including the client's need for crisis assistance;

(2) responsibilities for children, family and other natural supports, and employers; and

(3) housing and legal issues.

(b) Within 24 hours of the client's admission, the license holder must complete an initial treatment plan for the client. The license holder must:

(1) base the client's initial treatment plan on the client's referral information and an assessment of the client's immediate needs;

(2) consider crisis assistance strategies that have been effective for the client in the past;

(3) identify the client's initial treatment goals, measurable treatment objectives, and specific interventions that the license holder will use to help the client engage in treatment;

(4) identify the participants involved in the client's treatment planning. The client must be a participant; and

(5) ensure that a treatment supervisor approves of the client's initial treatment plan if a behavioral health practitioner or clinical trainee completes the client's treatment plan, notwithstanding section 245I.08, subdivision 3.

(c) According to section 245A.65, subdivision 2, paragraph (b), the license holder must complete an individual abuse prevention plan as part of a client's initial treatment plan.

(d) Within five days of the client's admission and again within 60 days after the client's admission, the license holder must complete a level of care assessment of the client. If the license holder determines that a client does not need a medically monitored level of service, a treatment supervisor must document how the client's admission to and continued services in intensive residential treatment services are medically necessary for the client.

(e) Within ten days of a client's admission, excluding weekends and holidays, the license holder must complete or review and update the client's standard diagnostic assessment.

(f) Within ten days of a client's admission, the license holder must complete the client's individual treatment plan, notwithstanding section 245I.10, subdivision 8. Within 40 days after the client's admission and again within 70 days after the client's admission, the license holder must update the client's individual treatment plan. The license holder must focus the client's treatment planning on preparing the client for a successful transition from intensive residential treatment services to another setting. In addition to the required elements of an individual treatment plan under section 245I.10, subdivision 8, the license holder must identify the following information in the client's individual treatment plan: (1) the client's referrals and resources for the client's health and safety; and (2) the staff persons who are responsible for following up with the client's referrals and resources. If the client does not receive a referral or resource that the client needs, the license holder must document the reason that the license holder did not make the referral or did not connect the client to a particular resource. The license holder is responsible for determining whether additional follow-up is required on behalf of the client.

(g) Within 30 days of the client's admission, the license holder must complete a functional assessment of the client. Within 60 days after the client's admission, the license holder must update the client's functional assessment to include any changes in the client's functioning and symptoms.

(h) For a client with a current substance use disorder diagnosis and for a client whose substance use disorder screening in the client's standard diagnostic assessment indicates the possibility that the client has a substance use disorder, the license holder must complete a written assessment of the client's substance use within 30 days of the client's admission. In the substance use assessment, the license holder must: (1) evaluate the client's history of substance use, relapses, and hospitalizations related to substance use; (2) assess the effects of the client's substance use on the client's relationships including with family member and others; (3) identify financial problems, health issues, housing instability, and unemployment; (4) assess the client's legal problems, past and pending incarceration, violence, and victimization; and (5) evaluate the client's suicide attempts, noncompliance with taking prescribed medications, and noncompliance with psychosocial treatment.

(i) On a weekly basis, a mental health professional or certified rehabilitation specialist must review each client's treatment plan and individual abuse prevention plan. The license holder must document in the client's file each weekly review of the client's treatment plan and individual abuse prevention plan.
